Frameworks:	Express, React, Vue, NextJS
Graphic Design Tools:	Photoshop, Adobe XD Figma, TeleportHQ,
Website builders/CMSs:	WordPress, Divi, Webflow, Framer
Backend Technologies:	SQL, MongoDB, GraphQL, PineconeDB

## EXPERIENCE SUMMARY

### Web Designer/Developer - Kauai Historical Society

Kauai, Hawaii: March 2020 – April 2022

**Technologies:** Adobe XD, Photoshop, Figma, WordPress, Divi Wordpress Builder, PHP, HTML, CSS, JavaScript

**Overview:** Redesigning Kauai Historical Society's from the ground up to give it a more modern look using WordPress and Divi. In addition, collaborating closely with stakeholders at the KHS including Directors, managers, and donors to ensure their history was well represented on the website. This helped increase donations to KHS over the 2019-2020 donation period.

---

### Web Designer - Call for Humanity

Minneapolis, Minnesota: Jan 2021 – Feb 2022

**Technologies:** Figma, Photoshop, WordPress, PHP, HTML, CSS, JavaScript

**Key project:** Helped design, develop and create a web application for Call for Humanity a local non-profit based out of Minnesota using PHP, HTML, CSS and using Wordpress as a CMS. Additionally collaborated with stakeholders at Call for Humanity including Directors, board members, and donors. Worked in a team environment which included a designer, product manager, and another developer.

---

### **Web Designer/Developer - One Child Canada (Remote)**

Toronto, Canada: May 2019 – March 2020

**Technologies:** Adobe XD, Photoshop, Figma WordPress, PHP, HTML, CSS, Divi

**Overview:** Conducted a comprehensive audit of OneChild's old website. Worked closely with the founder to add pages to the current website and made edits to existing pages. Additionally maintained website from Jan 2020 - Feb 2021

---

### **Target Location Search Application - Bootcamp Project for Target Corp**

University of Minnesota - March 2023

**Technologies:** NodeJS, JavaScript, SQL, Handlebars, Tailwind CSS, HTML, CSS

**Project Description:** A web application created for a client at Target Corp, which allows users to search for Target property/store locations and obtain the address, city, state, and zip code of the location. In addition, the application embeds a Google map into the page for each location searched. The application also contains sign up, sign in, log out, and guest functions to enhance user experience.

## **PROJECTS**

### **Pricema AI - Bootcamp Project**

University of Minnesota - May 2023

**Technologies:** React, NodeJS, GraphQL, MongoDB, Express, PineconeDB, OpenAI, JavaScript, Python, HTML, CSS

**Project Description:** An AI chat application that allows users to find the best price for an item based harnessing the power of LLMs and OpenAI. User can have a natural language conversation with the AI agent and find the best prices for products they are looking for. Additionally users are able to perform data analysis on sales or other data they provide to the agent.

---

### **DND Encounter Creator**

University of Minnesota - Jan 2023

**Skills Sets:** HTML, CSS, JavaScript, 3JS

**Project Description:** A Dungeons and Dragons (DnD) 5th Edition encounter builder for Dungeon

Masters (DMs). The application allows DMs to create and track combat encounters for their DnD campaigns, giving them the ability to add monsters for their players to fight using a DnD 5e API linked to a database for monster stat sheets, while being able to track player character and enemy stats such as health and armour class. The application also allows the user to create an encounter for future use, and has a link to an external Spotify API to add background music to the fight.
